The grit classifier is an essential part of the wastewater treatment process. The grit classifier separates and removes grit after primary treatment (barscreens) prior to the aeration basins. The removal of grit (rocks, gravel, sand, and organic material) is important to keep solids handling and disposal to a minimum. This project will replace the existing grit classifier with new equipment.

Status: A contract with Western Environmental Equipment Company will be presented to City Council for approval on September 24, 2019.
